Story

Davy the Chameleon likes nothing better than a nice walk through the jungle, finished up with a rest on his favorite stump. One day as he is sitting enjoying the sun, a well-dressed white rabbit wearing a black silk hat and vest appears in front of him, hurrying along the top of a log.

"Oh dear, oh dear, I should not be late!" mutters the rabbit in a panicky voice.

"Late for what?" wonders Davy.

The rabbit hurries along and jumps into a strange looking pot. The inside of the pot is covered with a rainbow-colored mist.

"Who on earth can that rabbit be? And why is he wearing such fancy clothes?" Davy just can't work it out. Maybe the rabbit is friends with someone living here in the jungle? Or maybe...?

Boiling! Davy leaps down from the stump and straight into the pot, determined to catch up with the rabbit.

The mist gradually lifts and Davy finds himself in a jungle. But not the jungle he knows - everything looks different and his favorite stump is missing.

"Huh?"

Suddenly Davy finds he has more important things to worry about than the scenery.

"Yikes!!!"

Looking down, he sees he no longer has a chameleon's body. . . He is standing on two legs instead of four, wearing gloves and a backpack. What on earth has happened to him?"

"I've got to find that rabbit," he thinks, "and ask him how to get back home!"

Davy sets off to find the white rabbit. The jungle isn't dense so he has a good view all around. He can hear the sound of a waterfall a little way off.

Your adventure with Davy in the Land of Wonder is now about to begin. All you have to rely on is your tongue, your intelligence, and your courage. Good luck and good licking!

Collectable Items

7. Stages and Hints

This is Davy's first challenge. The first enemies attack in a pack. Keep a little distance away and use the Shishkebab Attack (page 11) and Machine Gun Attack (P.11) against them. Use Quick Movement (page 10) to quickly move from stake to stake. Halfway up the mountain you'll find a dangerous old mine. Be careful! Use Quick Rotation (page 10) to advance. Use butterflys to defeat Lizard Kong, King of the jungle.

Watch out for the fish when you cross the waterfall.

Jungle spiders come out of the eggs.

Your tongue is ineffective against Rock Man so use a poisonous spider instead.

Ant Land is a kingdom of giant ants. They keep coming and coming at Davy in endless columns. Shoot your tongue straight out or in an L-shape, and do a Tongue Stand to get lots of ants in one go. Use Rotation Attacks (page 12) against the large, two-legged Marble Kids.

Quintella the Queen Ant swings herself around and attacks Davy. Using stakes effectively is important here.

Use Shishkebab Attacks against Weiners.

The Bad tackle moves quickly. Take careful aim and hit it with a Machine Gun Attack.

A long column of Arinkos. Don't you get the feeling there's an item on the other side of them...?

Bomb Land

Skillful use of Rocket Bombs is essential in this stage. Catch them and use them to blow up giant blocks and Bomb Armies so that you can progress. You can create chain explosions by lining up bombs in a row. Carefully guide the Bomb Armies into position then set off a Rocket Bomb to do a dynamic mega explosion. If you do a big enough explosion an item may appear.

Blow up the blocks to open up a path.

Blow up Copters to make the dangerous red sections of the flow harmless.

Powerful bombs are fired from the cannon. Watch your feet!

Desert Castle

This stage is set in a stone castle towering up in the middle of the desert. Use your tongue to protect yourself as you progress (page 12). The quicksand slopes are difficult to manage. You cannot use the Control stick to move in the normal way. Grab stakes with your tongue to move yourself forwards. You will need to have mastered the Tongue High Jump (page 11) to clear this stage. Switch perspective to check to Davy's left and right, and above and below him.

Time for a Tongue High Jump!

Quick Movement is the way to go over quicksand. Don't let the stress get to you!

A flying carpet. There are items in the sky as well...

Kids Land is a land of cakes, sweets and adventure. Use the skills you've learned to move across the crackers, chocolate and cakes. Cram your mouth full of Chocolate Kids to attack the Hoppies that come at you from the sky. There are items hidden in the places where the ceiling is high. The boss character is invulnerable when rotating. Could its weak point lie in its power source....?

Hit the wafer with a Machine Gun Attack to get the hidden items

Caramel with beams of white light coming out of it? Move ahead using Quick Rotation.

Switch perspective and you might find stakes in places like this.

Ghost Castle

This is the most mysterious stage in this mysterious world. Many strange and spooky challenges await Davy - rotating rooms with moving floors, and haunted floors that won't appear unless you light a candle; rooms in which you must cross over the top of rotating barrels to progress; and rooms with stairs swarming with eerie Japanese wooden clogs clattering up and down, and two different poltergeists, one Japanese-style and one Western-style.

Is there a final enemy lying in wait for Davy? Will he ever be able to make it back home? It all depends on your skill in using Davy's tongue.

A giant library. Oh no - the room's spinning!

A Japanese poltergeist. Your image is reflected in the Cursed Mirror.

Makes your character twice as heavy for increased defensive power.

Makes your character and the objects it spits out bigger for increased attack power.

Makes your character smaller.

Makes other players' characters smaller.

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press start while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.
